

The JCB disc cutter is a well balanced, quiet unit designed for use with JCB Powerpacks. It cuts most materials including metals, concrete and stone.

The disc cutter has a tooth belt drive which is suited to dusty and dirty working conditions. All working parts are totally enclosed. The disc is protected by a steel guard, adjustable to any of three positions.

Due to its hydraulic design the JCB disc cutter offers low cost maintenance (no carburettor to choke up!) with very quiet operation and almost total freedom from vibration.

An ideal cutter for many work sites and most applications.

- Flow regulator to prevent over-speeding
- Adjustable guard for safety
- Tail hoses with flat faced quick release dripless couplings for speed of change
- Removable handle for right or left hand operation
- No carburettor to clog with dust
- One stone cutting disc and one metal cutting disc included

Model name	Disc cutters
Model number	5024
Disc cutter diameter mm (in)	300 (12)
Arbour diameter mm (in)	22 (7/8)
Max. cutting depth mm (in)	102 (4)
RPM lpm	6000 @ 20
Pressure range bar (psi)	106 – 176 (1500 – 2500)
Flow range lpm (UK gal/min)	18 – 21 (4.0 – 4.6) Class C
Operating weight kg (lb)	10 (22.5)
Length mm (in)	650 (26)
Height mm (in)	320 (13)
Width (including handle) mm (in)	260 (10)
Vibration m/s ²	3.67
